MARK GORES

Prior Lake, MN | linkedin.com/in/markgores | portfolio.markgores.com

Product-minded builder with 22 years of real estate experience, now shipping generative AI products: an AI staging analysis app on the App Store, autonomous pipelines that wrote, illustrated, and published 179 social carousels, and LLM tools working agents use. Everything is built AI-first: Claude Code is my primary instrument, and I decide what gets built, direct the work, review what ships, and own every quality bar. Looking to bring practitioner-grade real estate context and hands-on generative media experience to a team building AI-powered creative tools.

EXPERIENCE

Founder

Landau Labs LLC | 2024 - Present | Prior Lake, MN

Building AI-powered software products end to end: problem selection, design, build, launch, acquisition, iteration.

ListReady (App Store + trylistready.com) - AI staging analysis on two surfaces: a native SwiftUI iOS app and a TypeScript/Next.js web funnel sharing one Node API. A 30 to 90 second room video becomes a prioritized stager punch list, every action traceable to its source frame. Picked the production model by testing three Claude models head to head on real room footage (about 8 cents per scan); frames extract identically on every run, so follow-up questions reuse the prompt cache and cost a tenth as much, verified with live token counts.

AI Social Autopilot - Autonomous carousel pipeline for Historical Pen Pals: picks a figure and topic, writes a four-letter exchange in the figure's documented voice, generates scene imagery under per-figure likeness-safety tiers, composites six 1080x1920 slides, publishes to Instagram, Facebook, and TikTok via the Postiz API. 179 carousels in five months at about $0.30 each. A second pipeline still renders twice-weekly Prior Lake Events posts through an HTML template family in headless Chromium.

OfferPresenter (offerpresenter.com) - AI offer tooling for agents: extracts structured deal terms from purchase agreement PDFs with Claude, renders color-coded comparison grids with net-to-seller math, and assembles branded offer packages. Next.js, Vercel, Neon Postgres. In beta with a 250-agent brokerage team.

Historical Pen Pals - D2C generative media product: personalized letters from 45+ historical figures, written in character by an LLM, drawn in real ink by an automated pen plotter, and mailed. Prompt architecture holds voice and conversational memory across a letter series. Full Meta acquisition funnel with CAC and unit economics tracking.

Prior Lake Events (priorlakeevents.com) - Local events platform and twice-weekly newsletter: 1,100+ subscribers at a 63 to 65% open rate, monetized through self-serve sponsor tiers. The authoritative source for Prior Lake events across Google and LLM results.

priorlake.realestate - Hyperlocal market dashboard and live MLS listings feed: complete photos, open houses, address-level estimates, custom metrics (Bidding War Rate, Negotiability Index), and a Useless Stats page that gets quoted back to me. NorthstarMLS via MLS Grid. Next.js/Vercel/Turso.

PLYCMN.com (client) - Hired by the Prior Lake Yacht Club board to build the 60-year-old club's first website: brand system from the club's photographed burgee, gated members area on Cloudflare Pages Functions, self-serve member photo galleries on R2 with in-browser resizing, content pages generated from one Python source. Runs itself with no developer after handoff.

Listings and Solds (shuttered) - Full MLS consumer search with computer vision search by visual features such as cabinet color and flooring type. Worked; shelved when CV inference costs at MLS photo volume didn't hold up.

Real Estate Agent

Edina Realty 2004 - 2020 | RE/MAX Advantage Plus 2020 - Present | Prior Lake, MN

22 years as a licensed agent in the south metro Minneapolis market: listings, buyer representation, offer negotiation, market analysis. Daily contact with the MLS systems, CRM tools, and workflow friction that decide what agents actually adopt.

SKILLS

AI/LLM: Anthropic + OpenAI APIs | Prompt Design | Structured Outputs | Prompt Caching | Head-to-Head Model Testing | Image Generation (gpt-image) | Likeness-Safety Policy

Production stack shipped: TypeScript | Node.js | Next.js/React | Swift/SwiftUI | Python | Postgres (Neon/Drizzle) | ffmpeg | PIL | Playwright Rendering | StoreKit 2 | Stripe | Vercel | Cloudflare Pages/R2 | AWS/S3

How I build: Claude Code as the primary instrument, daily | Multi-repo workflow, custom skills, MCP servers | Git/GitHub

Growth & Design: Brand Systems | Template Families | Meta Ads | Email Marketing (63-65% open) | SEO/GEO

Domain: Residential Real Estate (22 years) | MLS Systems | NorthstarMLS | Agent Workflows | Offer Negotiation

EDUCATION

University of Iowa | B.A., Economics | 1999 - 2004
